

For 3 years in a row, ISA CropCare has proudly been the **top seller world wide** for the product **Siltac SF**.

This was celebrated last week at ICB Pharma in Poland. We continue to work hard this year to keep this number one position.

In 2024 new markets will open up. We hope to start sales in Germany of our adjuvant Spreadit. Currently we are finalizing the label and creating a brand-new logo for this product.

In the meantime, we continue to work on the registration process of Siltac SF in South Africa, together with our partners Andermatt Madumbi.

Other new products will be launched as well, so keep a close eye on our website.

We keep on investing in the existing sales areas to suit our client's needs even more. With our green products we strive for a sustainable future for the agricultural sector. Our goal is to be top seller in 2024 again.

We thank ICB Pharma and all our partners for their continues support and hope we can have a successful year together again
