

### **ISA CropCare Remains the Global Bestseller in 2024!**

Once again, we are proud to announce that ISA CropCare remains the number one global seller of Siltac SF in 2024! This success is the result of our dedicated team, the support of our partners, and, of course, the trust of our customers. We continue to innovate and invest to strengthen and expand our position as a market leader.

### **New Developments in 2024**

This year, we have reached a major milestone with the successful launch of Spreaddit in Germany. The initial sales results are promising, and we expect this product to be a valuable addition for growers aiming for more efficient crop protection applications.

Additionally, we have taken another significant step forward in South Africa, where the registration dossier for Siltac SF has officially been submitted. This brings us closer to introducing this innovative product to the South African market, where the demand for sustainable crop protection continues to grow.

### **Clarity on Siltac SF in Belgium and the Netherlands**

In 2024, there has been some uncertainty regarding the approval of Siltac SF in Belgium. However, we can confirm with certainty that there are no restrictions on the use of Siltac SF in both the Netherlands and Belgium. This means that growers in both countries can apply the product without restrictions in all crops. This is an important confirmation, as Siltac SF remains an essential tool for integrated crop protection.

## Looking Ahead

Beyond these developments, we continue to invest in our existing markets to better meet the needs of our customers. We are committed to providing sustainable solutions in the agricultural sector and will keep working with our partners to bring innovative and effective products to the market.

We sincerely thank ICB Pharma and all our partners for their continued trust and support. Together, we are working towards a successful and sustainable future!
