

# Magsimize® - PFC 1(C)(I)(b)(i) – Straight liquid inorganic macronutrient fertiliser

Fertiliser (Mg) 6,7

**LANXESS**  
Energizing Chemistry

## Instructions for Use

- ✓ Shake well before opening the can.
- ✓ Apply 1 L Magsimize per hectare.
- ✓ Half fill the spray tank with water. Add the correct amount of Magsimize concentrate, then top up the tank with water and mix thoroughly.
- ✓ Use the spray solution within 8 hours after preparation.
- ✓ Do not mix with other products.
- ✓ Always perform a small-scale trial spray before applying the product on a larger scale.
- ✓ Spray when conditions allow the product to dry. Do not use the product when early rain is expected.
- ✓ Frequency recommended: once per week.
- ✓ Best used during periods of active growth and stress conditions when magnesium demand is high.
- ✓ Especially recommended under high nitrogen or potassium fertilization, which can limit natural magnesium uptake from the soil.
- ✓ Foliar application provides a direct and fast correction.

## DISCLAIMER

Research and experience have shown that the product, when used in accordance with our instructions, is suitable for the specified uses. Products conform to specifications at the time of delivery. However, since storage, transportation, use, or weather conditions before, during, and after application may affect performance and are beyond our control, neither we nor our distributors accept responsibility for the results achieved and/or any damage resulting from storage, transport, or application.

## Ingredients

Benzoic Acid<sup>1</sup> CAS 65-85-0  
Magnesium sulfate<sup>1</sup> CAS 7487-88-9  
1 CMC1: Virgin material substances and mixtures

## Declared Nutrient Content by Mass (% m/m)

Magnesium oxide (MgO) - water soluble: 6,7%  
Physical Form: Liquid – Suspension

## Storage Conditions

Shelf life: 18 - 24 months from production date.  
Storage environment: Store in closed, dry warehouse under roof cover.  
Storage temperature/moisture: Keep in cool, dry conditions (5-35°C). Protect from moisture and direct sunlight.  
Incompatibility with other materials: Keep away from acids, oxidizing agents, and incompatible materials.
