

Magnesium fertilizer 6,7% MgO

Instructions for use:

- Shake the container well before use.
- Fill the spray tank halfway with water, add the required amount of Magsimize, then fill up with water and mix thoroughly.
- Measure the pH. An acidic solution supports magnesium uptake.
- Use a compatible spreading agent.
- Use the tank mixture within 8 hours after preparation
- Do not mix with other products.

Storage conditions:

Shelf life: 18–24 months from the date of production.

Store in a closed, dry and covered area at 5–35°C.

Protect from moisture and direct sunlight.

Keep away from acids, oxidising agents and incompatible materials.

Application:

- Recommended dose: 1 L per hectare.
- Always carry out a small-scale trial before large-scale application.
- Apply under conditions favourable for foliar uptake.
- Avoid rainfall shortly after application.
- Recommended frequency: once per week.
- Use during periods of active growth or stress when magnesium demand is high.
- Apply where nitrogen and potassium fertilisation levels are high.
